Aluminium door ladder
for safe loading
and unloading.

**Mounting
without
drilling!**

Aluminium door ladder

With the clampable aluminium ladder you enjoy optimum safety for the daily loading and unloading of your goods on our **AluRack** roof rack. Let the benefits convince you!

Mounting without damaging your vehicle

Thanks to a handy clamping system this light aluminium ladder can easily be installed by one person without having to drill into the bodywork. Your vehicle thus preserves a high second-hand value. Moreover, you can easily reuse the ladder on your next vehicle of the same type.

Best material for sustainable use

The aesthetic, light aluminium design is corrosion resistant and durable. On top of this, the low weight of the ladder ensures reduced fuel consumption.

A door ladder with a permanent perfect fit

The Prime Design Europe door ladder is currently custom-designed for the **Ducato, Sprinter, Crafter, Boxer, Jumper, Movano, NV400, Master and Daily**. Your ladder will precisely fit the dimensions of the rear of your company vehicle and will not interfere with your daily work. Soon it will be available for other models as well!
